REAR SEAT COVERS
ROLL OF 150 PCS
CM. 160X134+58+28
WHITE HDPE 10μ
CUSTOMIZED PRINT
Minimum quantity: 30 rolls

The universal **disposable CTR** seat cover is made of white **waterproof** HDPE, **prevents contamination** by pathogens by covering the entire surface of the rear seats for a **total protection**.

Adaptable to any sitting, it covers all the seats in the front, while a first **upper pocket** allows positioning by "hooking" to the headrest and a second **pocket in the lower** part allows fixing, so as to adhere to the seat preventing it from sliding.

The use of this protective device can ensure regular customer turnover and **protect areas** otherwise difficult to **clean and / or sanitize**.

For the use of this product on station wagon or two-volume cars, it is recommended to fold the backrest, hood the deeper pocket and reposition the backrest.

For the use of this product on three-volume cars, if the backrest cannot be folded down, it is recommended to raise the rear head restraints and hood the deeper pocket on the head restraints.

The seat cover **can be customized** with a print on request.

Packaged in pre-cut rolls of 150 seat covers packed in carton boxes.
