

CAR MASKING FILM

AntiDrop®

HDPE
LIGHT BLUE
13 MICRON

1 COLOR
CUSTOMIZABLE
PRINTING

The ANTIDROP masking film in light blue HDPE is composed by a **specific mixture capable of absorbing** any residual moisture left on the bodywork **preventing stains and halos** during the use.

With high quality of **external impermeability** and **resistance to perforation**, it is compatible with the most modern painting systems and oven temperatures.

The **high electrostatic property** and the **special treatment for the adhesion of the paint**, which retains the deposits avoiding the "peeling" phenomenon, allow a quick and effective shielding.
